BOOSTER*

Ready, Set, Glow

Brighten, tighten and let your skin glow as Swissline's Cell Shock Age Intelligence™ Radiance Booster will have your skin looking more luminous than ever

For those suffering with lackluster or tired-looking skin, this radiance booster may just be what your skin has been craving. Vitamin C has proven to be really beneficial for the skin when incorporated into skincare correctly. Recognized as an antioxidant, it illuminates the complexion and reduces the signs of aging. With continuous use, watch your skin brighten and become more evenly toned. Swissline's Radiance Booster combines pure L-ascorbic acid – the most active, yet less stable form of vitamin C – and an ascorbic acid salt form, which greatly contributes to better stabilise the very high concentration of vitamin C used.
